Basic

Chapter 10

Functions: write once, use forever

A function is a recipe card with a name.

In these notes

- ✓ def, parameters and return
- ✓ Default and keyword arguments
- ✓ *args: any number of values
- ✓ Scope: where a variable lives

The chai shop story

Raju makes masala chai the same way every time, just with different sugar and cups. So he writes one recipe card: "make_chai(cups, sugar)". His helper reads the card, fills in the numbers and hands back the chai. That reusable card is a function.

Remember: A function is a recipe card with a name.

Every program is a little story.

CHAPTER 10

Sneak peek: the rest of this topic

Inside the full book:

- The idea, explained simply
- Syntax up close
- Two worked examples + real output
- Line-by-line walkthrough
- Common mistakes and fixes
- Practice + challenge
- Answers + cheat sheet
