Intermediate

Chapter 11

Errors and debugging

Errors aren't failures. They're Python telling you exactly where to look.

In these notes

- ✓ Reading a traceback like a pro
- ✓ try / except: catch errors politely
- ✓ else and finally
- ✓ raise: create your own errors

The chai shop story

A customer types "teen" when asked how many cups. Old Raju's program crashed and the whole shop stopped. New Raju's program says "Please type a number like 3" and keeps going. Errors will always happen; good programs expect them.

Remember: Errors aren't failures. They're Python telling you exactly where to look.

Every program is a little story.

CHAPTER 11

Sneak peek: the rest of this topic

Inside the full book:

- The idea, explained simply
- Syntax up close
- Two worked examples + real output
- Line-by-line walkthrough
- Common mistakes and fixes
- Practice + challenge
- Answers + cheat sheet

Liked the preview?

The complete **Python with Chai** book has all 20 topics in 200 handwritten pages: the idea, syntax, worked examples, line-by-line walkthroughs, common mistakes, practice with answers and a cheat sheet for every topic.
