Intermediate

Chapter 13

Modules and the standard library

Python comes with a toolbox. Don't build every tool yourself.

In these notes

- ✓ import, from ... import, as
- ✓ math, random and datetime
- ✓ Making your own module
- ✓ pip: installing more tools

The chai shop story

Raju doesn't build his own gas stove or grind his own steel spoons. He buys good tools and uses them. Python is the same: it ships with hundreds of ready modules (the standard library), and pip downloads thousands more. A coder's skill is knowing which tool to pick.

Remember: Python comes with a toolbox. Don't build every tool yourself.

CHAPTER 13

Sneak peek: the rest of this topic

Inside the full book:

- The idea, explained simply
- Syntax up close
- Two worked examples + real output
- Line-by-line walkthrough
- Common mistakes and fixes
- Practice + challenge
- Answers + cheat sheet

Liked the preview?

The complete **Python with Chai** book has all 20 topics in 200 handwritten pages: the idea, syntax, worked examples, line-by-line walkthroughs, common mistakes, practice with answers and a cheat sheet for every topic.
