Basic

Chapter 3

Strings: playing with text

Make your text shout, whisper and split, with one word each.

In these notes

- ✓ Joining and repeating text
- ✓ String methods: upper, lower, replace, strip
- ✓ Indexing and slicing text
- ✓ f-strings: fill-in-the-blanks text

The chai shop story

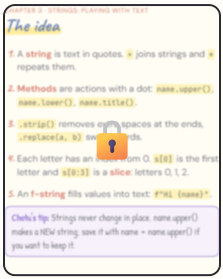

Raju prints a small bill for every customer. Sometimes the name comes in ALL CAPS, sometimes with extra spaces, sometimes misspelled. Instead of rewriting by hand, Python gives him tools: make it neat, cut a piece, replace a word, fill a template. Text in Python is called a string.

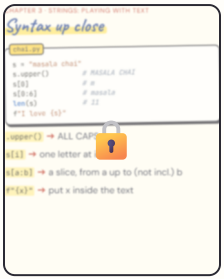

Remember: Make your text shout, whisper and split, with one word each.

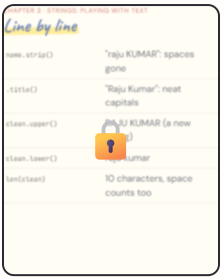

CHAPTER 3

Sneak peek: the rest of this topic

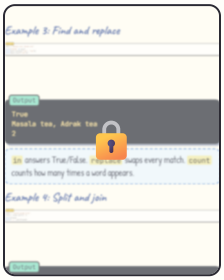

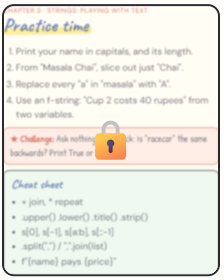

Inside the full book:

- The idea, explained simply
- Syntax up close
- Two worked examples + real output
- Line-by-line walkthrough
- Common mistakes and fixes
- Practice + challenge
- Answers + cheat sheet

Liked the preview?

The complete **Python with Chai** book has all 20 topics in 200 handwritten pages: the idea, syntax, worked examples, line-by-line walkthroughs, common mistakes, practice with answers and a cheat sheet for every topic.
