Basic

Chapter 7

Lists: many items, one box

One list can hold the whole menu.

In these notes

- ✓ Making lists and reading items
- ✓ Adding, removing and sorting
- ✓ sum, min, max and in
- ✓ Lists inside lists

The chai shop story

Raju writes the day's orders on a long slip: Masala, Adrak, Masala, Tulsi... He adds new ones at the bottom, crosses out cancelled ones, and at night sorts them to see what sold most. A Python list is exactly that slip: an ordered row of items you can change.

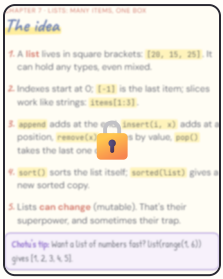

Remember: One list can hold the whole menu.

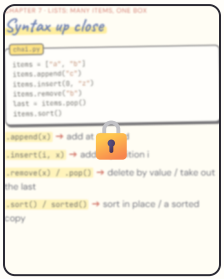

Every program is a little story.

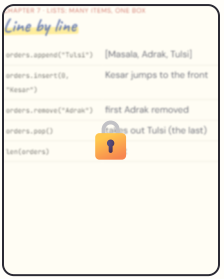

CHAPTER 7

Sneak peek: the rest of this topic

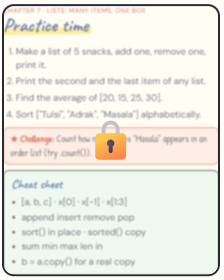

Inside the full book:

- The idea, explained simply
- Syntax up close
- Two worked examples + real output
- Line-by-line walkthrough
- Common mistakes and fixes
- Practice + challenge
- Answers + cheat sheet
