Basic

Chapter 8

Tuples and sets

Some things never change, some never repeat.

In these notes

- ✓ Tuples: fixed, unchangeable groups
- ✓ Unpacking a tuple into names
- ✓ Sets: unique items only
- ✓ Set maths: union and intersection

The chai shop story

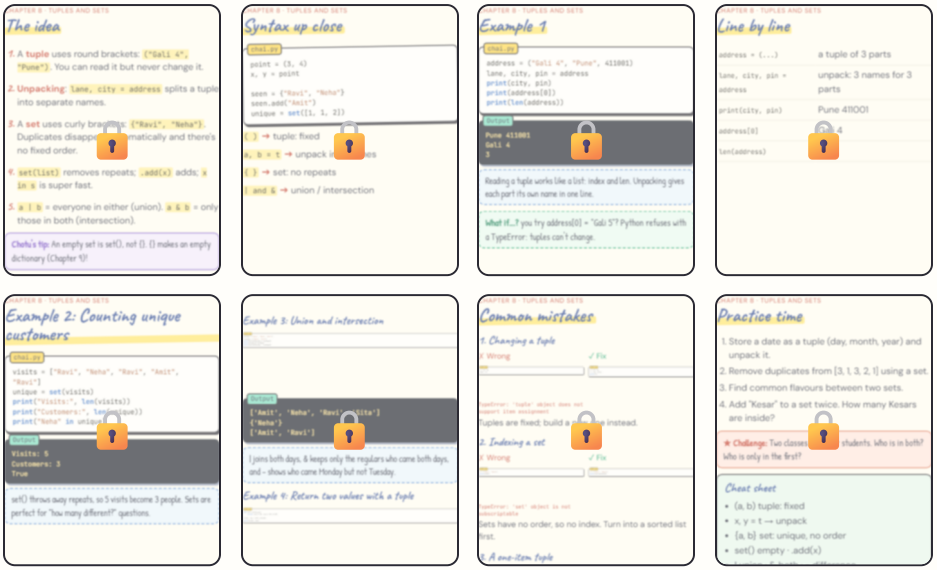

Raju's shop address never changes: lane, city, pin code. He writes it once and never edits it, like a tuple. At the end of the day he wants to know how many DIFFERENT customers came, not how many visits. Ravi came three times but is one person. That's a set.

Remember: Some things never change, some never repeat.

CHAPTER 8

Sneak peek: the rest of this topic

Inside the full book:

- The idea, explained simply
- Syntax up close
- Two worked examples + real output
- Line-by-line walkthrough
- Common mistakes and fixes
- Practice + challenge
- Answers + cheat sheet

Liked the preview?

The complete **Python with Chai** book has all 20 topics in 200 handwritten pages: the idea, syntax, worked examples, line-by-line walkthroughs, common mistakes, practice with answers and a cheat sheet for every topic.
