Functions: write once, use forever

> A function is a recipe card with a name.

In these notes

- ✓ def, parameters and return
- ✓ Default and keyword arguments
- ✓ *args: any number of values
- ✓ Scope: where a variable lives

The chai shop story

Raju makes masala chai the same way every time, just with different sugar and cups. So he writes one recipe card: "make_chai(cups, sugar)". His helper reads the card, fills in the numbers and hands back the chai. That reusable card is a function.

> **Remember:** A function is a recipe card with a name.

Inside Chapter 10 in the full book

10. Functions: write once, use forever

- The idea, explained simply
- Syntax up close
- Two worked examples with real output
- Line-by-line walkthrough
- Two more examples
- Common mistakes, with the real errors
- Practice, a challenge and a cheat sheet
- Answers at the back of the book

The full book: 30 chapters · 336 pages · Basic to Expert · PDF + EPUB
