Chapter 14
Classes and objects

> One blueprint, many chai shops.

In these notes

- ✓ Class = blueprint, object = real thing
- ✓ __init__ and self
- ✓ Methods: things an object can do
- ✓ Many objects, separate data

The chai shop story

Raju's chai is so popular that his cousins open branches: Raju's on MG Road, Pappu's near the station. Each shop has a name, a menu and its own cup count, but they all work the same way. Instead of copying code for every shop, Raju writes one blueprint, a class, and creates as many shops (objects) as he likes.

> **Remember:** One blueprint, many chai shops.

Every program is a little story.

Inside Chapter 14 in the full book

14. Classes and objects

- The idea, explained simply
- Syntax up close
- Two worked examples with real output
- Line-by-line walkthrough
- Two more examples
- Common mistakes, with the real errors
- Practice, a challenge and a cheat sheet
- Answers at the back of the book

The full book: 30 chapters · 336 pages · Basic to Expert · PDF + EPUB
