Python with Chai

Write Python on your own

30 hands-on chapters, from your first line of code to your own Chai Shop app.

Raj

Basic

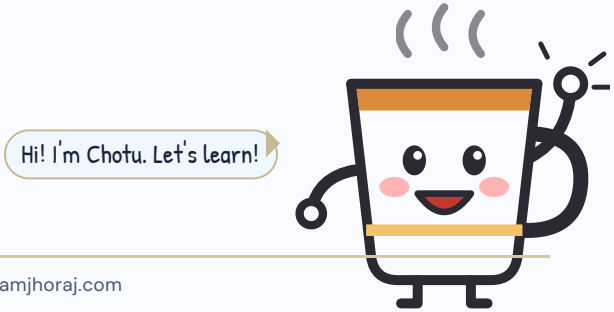

Chapter 3

Strings: playing with text

> Make your text shout, whisper and split, with one word each.

In these notes

- ✓ Joining and repeating text
- ✓ String methods: upper, lower, replace, strip
- ✓ Indexing and slicing text
- ✓ f-strings: fill-in-the-blanks text

The chai shop story

Raju prints a small bill for every customer. Sometimes the name comes in ALL CAPS, sometimes with extra spaces, sometimes misspelled. Instead of rewriting by hand, Python gives him tools: make it neat, cut a piece, replace a word, fill a template. Text in Python is called a string.

> **Remember:** Make your text shout, whisper and split, with one word each.

Inside Chapter 3 in the full book

3. Strings: playing with text

- The idea, explained simply
- Syntax up close
- Two worked examples with real output
- Line-by-line walkthrough
