Python with Chai

Write Python on your own

30 hands-on chapters, from your first line of code to your own Chai Shop app.

Raj

Expert

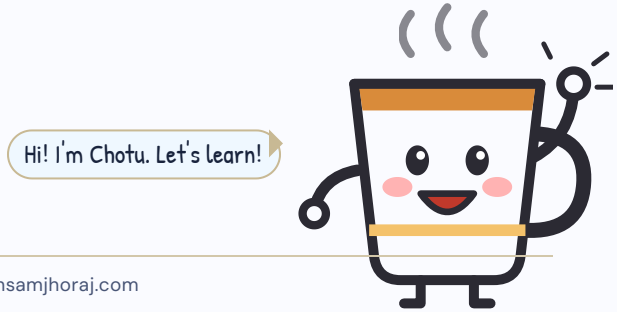

Chapter 30

Performance, and the expert capstone

> Measure first, then speed up. Then ship it.

In these notes

- ✓ Measuring with timeit and perf_counter
- ✓ Big-O thinking: list vs set vs dict
- ✓ Caching and generators for speed and memory
- ✓ Capstone: an async, logged, tested order system

The chai shop story

On Diwali, Raju's app slowed to a crawl. His nephew wanted to rewrite everything. Raju said: "First find which step is slow." They measured, found one slow search inside a loop, swapped a list for a set, and the app flew. Experts measure before they change code.

> **Remember:** Measure first, then speed up. Then ship it.

Inside Chapter 30 in the full book

30. Performance, and the expert capstone

- The idea, explained simply
- Syntax up close
- Two worked examples with real output
- Line-by-line walkthrough
