Python with Chai

Write Python on your own

30 hands-on chapters, from your first line of code to your own Chai Shop app.

Raj

Basic

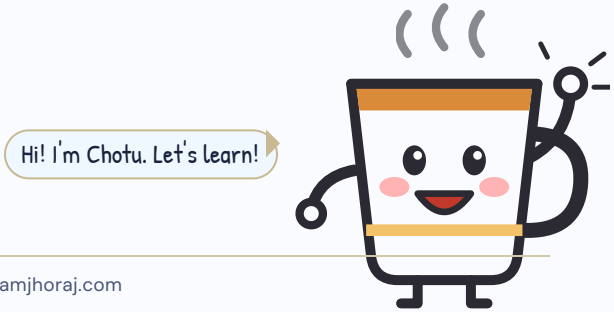

Chapter 4

Numbers, maths and input()

Let the customer type, and let Python do the maths.

In these notes

- ✓ Maths operators: + - * / // % **
- ✓ Order of operations
- ✓ input() and why it gives text
- ✓ Converting with int(), float(), str()

The chai shop story

A customer orders 7 cups. Raju packs them in trays of 3. How many full trays? How many cups are left over? What's the bill with 5% tax? Raju used to do this on paper. Now Python does it instantly, and even asks the customer how many cups they want.

> **Remember:** Let the customer type, and let Python do the maths.

Inside Chapter 4 in the full book
