Python with Chai

Write Python on your own

30 hands-on chapters, from your first line of code to your own Chai Shop app.

Raj

Basic

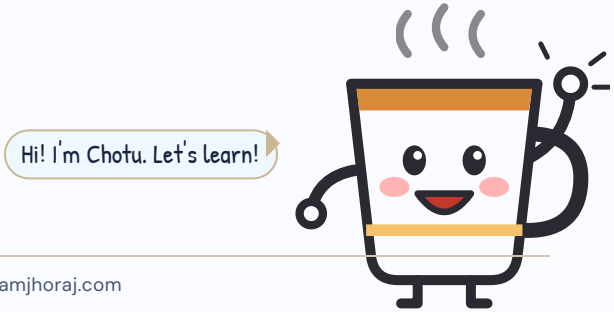

Chapter 6

Loops: do it again and again

100 cups? Write the step once, let the loop pour.

In these notes

- ✓ while: repeat while a condition is True
- ✓ for: walk through every item
- ✓ range(): counting machine
- ✓ break and continue

The chai shop story

At 7 am the office crowd arrives: 40 cups, one after another. Raju doesn't think 40 separate thoughts. He thinks one: "For each customer, pour a cup." And when the milk runs out, he stops. That repeated work with a stop rule is a loop.

> **Remember:** 100 cups? Write the step once, let the loop pour.

Every program is a little story.

Inside Chapter 6 in the full book

6. Loops: do it again and again

- The idea, explained simply
- Syntax up close
- Two worked examples with real output
- Line-by-line walkthrough
- Two more examples
- Common mistakes, with the real errors
