Basic

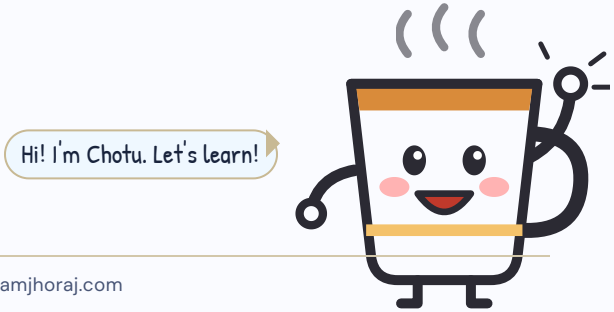

# Chapter 7

# Lists: many items, one box

One list can hold the whole menu.

## In these notes

- ✓ Making lists and reading items
- ✓ Adding, removing and sorting
- ✓ sum, min, max and in
- ✓ Lists inside lists

# The chai shop story

Raju writes the day's orders on a long slip: Masala, Adrak, Masala, Tulsi… He adds new ones at the bottom, crosses out cancelled ones, and at night sorts them to see what sold most. A Python list is exactly that slip: an ordered row of items you can change.

> **Remember:** One list can hold the whole menu.

# Inside Chapter 7 in the full book

## 7. Lists: many items, one box

- The idea, explained simply
- Syntax up close
- Two worked examples with real output
- Line-by-line walkthrough
