Dictionaries: the menu card

> Say the name, get the price. Instantly.

In these notes

- ✓ Keys and values
- ✓ Reading safely with .get()
- ✓ Adding, changing, deleting
- ✓ Looping and nesting

The chai shop story

A new helper asks, "How much is Adrak chai?" Raju doesn't count down a list; he looks at the menu card: Adrak, 15. Name on the left, price on the right. A dictionary is that card: you look things up by name, not by position.

> **Remember:** Say the name, get the price. Instantly.

Every program is a little story.

Inside Chapter 9 in the full book

9. Dictionaries: the menu card

- The idea, explained simply
- Syntax up close
- Two worked examples with real output
- Line-by-line walkthrough
- Two more examples
